SUMMARY

Senior Frontend Engineer with 3 years building production-grade EdTech and SaaS platforms in React, Next.js, and TypeScript. Shipped custom TipTap editor experiences, including block-based collaborative editing and an in-platform exam system, owned a Storybook-documented component library that cut new-feature build time by roughly a third, and published a local-first PWA to the Google Play Store. Focused on design-system ownership, accessible interfaces, and pixel-perfect implementation.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, Tailwind CSS, Radix/shadcn, Framer Motion, TipTap, TanStack Query, Redux Toolkit, Zustand, Storybook

Design & Accessibility: Design systems, design tokens, dark-mode theming, Figma, WCAG 2.1

Backend & Infra: Node.js, Express, Nest.js, PostgreSQL, MongoDB, AWS, Docker

EXPERIENCE

Senior Frontend Engineer (SDE III)

Aug 2025 – Jul 2026

ELT Global

Ernakulam, India

- Led frontend architecture for a large-scale EdTech platform serving 10k+ students with 5k+ monthly active users, setting technical standards across the codebase.
- Designed a component library of 30+ reusable UI elements with Tailwind CSS and Radix/shadcn, built to WCAG 2.1 standards and documented in Storybook, cutting new-feature build time by roughly a third.
- Optimized rendering performance through memoization, code-splitting, and caching strategies, achieving 50% faster page load times.
- Developed and optimized the LMS admin portal, improving performance by 20% and building exam evaluation features for streamlined grading workflows.
- Integrated AI coding agents into the development workflow to accelerate implementation, refactoring, and testing while retaining full ownership of design and code quality.

Frontend Developer

Dec 2024 – Jul 2025

ELT Global

Ernakulam, India

- Owned frontend delivery for the company's first production student portal, translating Figma designs into a pixel-perfect, component-based UI.
- Established the portal's frontend patterns and shared component conventions, laying the foundation for later LMS features.
- Partnered with designers to build and maintain a component-based design system across the portal and content surfaces.
- Set up the headless CMS publishing workflow that lets non-technical teams ship content independently.

Full Stack Developer

Aug 2024 – Dec 2024

Finanshels

Kozhikode, India

- Developed a platform that simplifies business finances through tax compliance insights and deadline tracking.
- Designed a responsive dashboard with interactive chart views, surfacing key compliance insights and company metrics at a glance.
- Built an end-to-end email notification system integrating the Gmail API for automated deadline reminders, using IndexedDB for performance and offline resilience.
- Contributed to a no-code tax filing automation initiative supporting streamlined compliance workflows.

Full Stack Development Intern

Aug 2023 – Jun 2024

Prototype

Trivandrum, India

- Completed an immersive full-stack MERN program, building end-to-end projects from ideation to deployment.
- Built OffiQ, a full-stack e-commerce platform using EJS, Node.js, Express, and MongoDB, integrating payment modules and real-time CRUD operations.

PROJECTS

AlloCat - Personal Finance PWA & Android App
2026 - Present

- Multi-currency personal finance application built as a local-first PWA with Next.js, React, and TypeScript, packaged for Android with Capacitor and published on the Google Play Store.
- Local-first data layer using IndexedDB and TanStack Query, with optimistic writes, a durable mutation queue with retry and rollback, and temporary-to-server ID reconciliation.
- On-device SMS transaction tracking for Android that parses bank and UPI debits and auto-categorises spending via learned merchant rules, with only hashed fields leaving the device.
- Complex UI interactions and navigation flows built with advanced Framer Motion animation patterns.
- Token-driven dark-mode theming built on CSS custom properties, with the viewer's theme preference persisted across sessions and native shells.
- Supabase authentication and sync, a Serwist service worker with PWA share-target ingestion, and a rate-limited AI assistant.

ELT Global Student Portal - EdTech Platform
Dec 2024 - Jul 2026

- Student portal for commerce professional courses with course discovery, purchase, and integrated payment flows on Next.js and TypeScript.
- In-platform exam system built on a customised TipTap editor, letting students attend and submit exams without leaving the product.
- Live class module on the Zoom Meeting SDK with a fully custom UI, replacing a third-party service and cutting monthly operational cost.
- Responsive, WCAG 2.1-compliant interfaces supporting live classes, recorded sessions, and LMS features.

Triple ICA Blog Platform - SEO-Optimized CMS
Dec 2024 - Jul 2026

- SEO-focused blog platform on Strapi CMS with optimized metadata, structured data, and performance tuning.
- Headless CMS architecture allowing non-technical teams to publish SEO-friendly content efficiently.

Enterprise Internal Automation System
Aug 2024 - Dec 2024

- Internal automation tooling for document processing, compliance tracking, and client onboarding.
- Asynchronous processing workflows on AWS SQS, reducing manual processing time by over 60%.
- Secure document storage and retrieval on AWS S3 with role-based access control.
- Automated Slack and email alerting for internal operational workflows.

ZenSync - Collaborative SaaS Platform
2024

- Block-based rich-text editor on TipTap with custom nodes, powering collaborative content creation inside the platform.
- Collaborative productivity platform built with TypeScript, Next.js, and Node.js/Express.
- JWT authentication, OAuth flows, and real-time communication using Livekit SDK.
- Clean Architecture principles with Zustand for scalable state management.

EDUCATION

Bachelor of Computer Applications
St. Aloysius College, Mangalore

2020 - 2023
CGPA: 8.16

VOLUNTEERING & LEADERSHIP

National Hackathon Mentor
St. Aloysius College, Mangalore

2023
Mangalore, India

- Mentored student teams at a national-level hackathon, providing guidance on full-stack development, architecture decisions, and best practices.

Full-Stack Development Workshop Instructor
College Workshop

2023
Mangalore, India

- Conducted a 2-day full-stack development workshop for 30+ participants, covering modern web development with React, Next.js, and TypeScript.
